

Product fiche concerning the COMMISSION DELEGATED REGULATION (EU) No 1061/2010 of 28 September 2010

Product code Rated capacity in kg of cotton for the standard 60 °C cotton programme at full load or the 40 °C cotton programme at full load, whichever is the lower Energy efficiency class A+ Energy consumption "X" kWh per year, based on 220 standard washing cycles for cotton programmes at 60 °C and 40 °C at full and partial load, and the consumption of the low-power modes. Actual energy consumption will depend on how the appliance is used Energy consumption - 60 °C cotton programme at partial load Energy consumption - 60 °C cotton programme at partial load Energy consumption - 60 °C cotton programme at partial load Energy consumption - 60 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load Energy consumption of 0°C cotton programme at partial load Energy consumption of the eff-on mode Use in the full load of the eff-on mode Use in the eff-o	Supplier name or brand	SMEG
Energy efficiency class Energy consumption "X" kWh per year, based on 220 standard washing cycles for cotton programme at 60 °C and 40 °C at full and partial load, and the consumption of the low-power modes. Actual energy consumption will depend on how the appliance is used Energy consumption -60 °C cotton programme at full load Energy consumption -60 °C cotton programme at partial load Energy consumption -40 °C cotton programme at partial load Energy consumption -40 °C cotton programme at partial load Energy consumption -40 °C cotton programme at partial load Energy consumption of the off-mode O.80 kWh Weighted power consumption of the left-on mode Water consumption "X" litres per year, based on 220 standard washing cycles for cotton programmes at 60 °C and 40 °C at full and partial load. Actual water consumption will depend on how the appliance is used Spin-drying efficiency class "X" on a scale from G (least efficient) to A (most efficient) Bhaximum spin speed attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programmes at overall studied for the standard 40 °C cotton programme at full load or the standard 40 °C cotton programmes are suitable to clean normally soiled cotton laundry and they are the most efficient programmes to which the information in the label and the fiche relates. These programmes are suitable to clean normally soiled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load 150 min Programme time of the 'standard 40 °C cotton programme' at partial load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW dur	Product code	WMFABAZ1
Energy consumption "X" kWh per year, based on 220 standard washing cycles for cotton programmes at 60 °C and 40 °C at full and partial load, and the consumption of the low-power modes. Actual energy consumption will depend on how the appliance is used Energy consumption - 60 °C cotton programme at full load Energy consumption - 60 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load Energy consumption of the off-mode O.2 W Weighted power consumption of the left-on mode Water consumption "X" litres per year, based on 220 standard washing cycles for cotton programmes at 60 °C and 40 °C at full and partial load. Actual water consumption will depend on how the appliance is used Spin-drying efficiency class "X" on a scale from G (least efficient) to A (most efficient) B Maximum spin speed attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load o Standard washing programmes to which the information in the label and the fiche relates. These programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load 150 min Programme time of the 'standard 60 °C cotton programme' at partial load For programme time of the 'standard 40 °C cotton programme' at partial load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load		7 Kg
programmes at 60 °C and 40 °C at full and partial load, and the consumption of the low-power modes. Actual energy consumption will depend on how the appliance is used Energy consumption - 60 °C cotton programme at full load Energy consumption - 60 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load Neighted power consumption of the off-mode Weighted power consumption of the left-on mode Water consumption "X" litres per year, based on 220 standard washing cycles for cotton programmes at 60 °C and 40 °C at full and partial load. Actual water consumption will depend on how the appliance is used Spin-drying efficiency class "X" on a scale from G (least efficient) to A (most efficient) B Maximum spin speed attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load o Standard washing programmes to which the information in the label and the fiche relates. These programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load 150 min Programme time of the 'standard 60 °C cotton programme' at partial load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load	Energy efficiency class	A+
Energy consumption - 60 °C cotton programme at partial load D.98 KWh Energy consumption - 40 °C cotton programme at partial load O.80 KWh Weighted power consumption of the off-mode O.8 W Water consumption "X" litres per year, based on 220 standard washing cycles for cotton programmes at 60 °C and 40 °C at full and partial load. Actual water consumption will depend on how the appliance is used Spin-drying efficiency class "X" on a scale from G (least efficient) to A (most efficient) Maximum spin speed attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load o Standard washing programmes to which the information in the label and the fiche relates. These programmes are suitable to clean normally soiled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load 150 min Programme time of the 'standard 40 °C cotton programme' at partial load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load	programmes at 60 °C and 40 °C at full and partial load, and the consumption of the	218 KWh
Energy consumption - 40 °C cotton programme at partial load Weighted power consumption of the off-mode Weighted power consumption of the left-on mode Water consumption "X" litres per year, based on 220 standard washing cycles for cotton programmes at 60 °C and 40 °C at full and partial load. Actual water consumption will depend on how the appliance is used Spin-drying efficiency class "X" on a scale from G (least efficient) to A (most efficient) B Maximum spin speed attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load o Standard washing programmes to which the information in the label and the fiche relates. These programmes are suitable to clean normally soiled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load 150 min Programme time of the 'standard 40 °C cotton programme' Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load	Energy consumption - 60 °C cotton programme at full load	1.08 KWh
Weighted power consumption of the off-mode Weighted power consumption of the left-on mode 0.8 W Water consumption "X" litres per year, based on 220 standard washing cycles for cotton programmes at 60 °C and 40 °C at full and partial load. Actual water consumption will depend on how the appliance is used Spin-drying efficiency class "X" on a scale from G (least efficient) to A (most efficient) Maximum spin speed attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load o Standard washing programmes to which the information in the label and the fiche relates. These programmes are suitable to clean normally soiled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load 150 min Programme time of the 'standard 40 °C cotton programme' at partial load 150 min Programme time of the 'standard 40 °C cotton programme' Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load	Energy consumption - 60 °C cotton programme at partial load	0.98 KWh
Weighted power consumption of the left-on mode Water consumption "X" litres per year, based on 220 standard washing cycles for cotton programmes at 60 °C and 40 °C at full and partial load. Actual water consumption will depend on how the appliance is used Spin-drying efficiency class "X" on a scale from G (least efficient) to A (most efficient) Maximum spin speed attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load o Standard washing programmes to which the information in the label and the fiche relates. These programmes are suitable to clean normally soiled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load 150 min Programme time of the 'standard 40 °C cotton programme' at partial load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load	Energy consumption - 40 °C cotton programme at partial load	0.80 KWh
Water consumption "X" litres per year, based on 220 standard washing cycles for cotton programmes at 60 °C and 40 °C at full and partial load. Actual water consumption will depend on how the appliance is used Spin-drying efficiency class "X" on a scale from G (least efficient) to A (most efficient) Maximum spin speed attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load o Standard washing programmes to which the information in the label and the fiche relates. These programmes are suitable to clean normally soiled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load 150 min Programme time of the 'standard 40 °C cotton programme' Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load 78 dB(A) re 1pW Table 10340 litres 10340 litres 10340 litres 10340 litres 10400 rpm 10400 rpm 10500 rp	Weighted power consumption of the off-mode	0.2 W
programmes at 60 °C and 40 °C at full and partial load. Actual water consumption will depend on how the appliance is used Spin-drying efficiency class "X" on a scale from G (least efficient) to A (most efficient) Maximum spin speed attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load o Standard washing programmes to which the information in the label and the fiche relates. These programmes are suitable to clean normally soiled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load Programme time of the 'standard 60 °C cotton programme' at partial load 150 min Programme time of the 'standard 40 °C cotton programme' Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load	Weighted power consumption of the left-on mode	0.8 W
Maximum spin speed attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load o Standard washing programmes to which the information in the label and the fiche relates. These programmes are suitable to clean normally soiled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load Programme time of the 'standard 60 °C cotton programme' at partial load 150 min Programme time of the 'standard 40 °C cotton programme' Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load 78 dB(A) re 1pW	programmes at 60 °C and 40 °C at full and partial load. Actual water consumption will	10340 litres
standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load o Standard washing programmes to which the information in the label and the fiche relates. These programmes are suitable to clean normally soiled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load Programme time of the 'standard 60 °C cotton programme' at partial load Programme time of the 'standard 40 °C cotton programme' Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load 78 dB(A) re 1pW	Spin-drying efficiency class "X" on a scale from G (least efficient) to A (most efficient)	В
These programmes are suitable to clean normally soiled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load Programme time of the 'standard 60 °C cotton programme' at partial load 150 min Programme time of the 'standard 40 °C cotton programme' Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load 78 dB(A) re 1pW	standard 40 °C cotton programme at partial load, whichever is the lower, and remaining	1400 rpm
Programme time of the 'standard 60 °C cotton programme' at partial load Programme time of the 'standard 40 °C cotton programme' Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load 78 dB(A) re 1pW	These programmes are suitable to clean normally soiled cotton laundry and they are the	Cotton 60° and Cotton 40°
Programme time of the 'standard 40 °C cotton programme' Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load 78 dB(A) re 1pW	Programme time of the 'standard 60 °C cotton programme' at full load	150 min
Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load 78 dB(A) re 1pW	Programme time of the 'standard 60 °C cotton programme' at partial load	150 min
for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load 78 dB(A) re 1pW	Programme time of the 'standard 40 °C cotton programme'	150 min
for the standard 60 °C cotton programme at full load		59 dB(A) re 1pW
Installation Free-standing	, , , , , , , , , , , , , , , , , , , ,	78 dB(A) re 1pW
