

**PRODUCT FORM**

Energy label Module: ELEC-HOODV01-4605201-e-01-0001

Brand		LGST P&G
Model		CG5005124
Energy efficiency class		A
Energy consumption (kWh) functional per cycle		-
Energy consumption (kWh) functional conversion per cycle		0.00
Rated volume (l net)		60
Number of cook top		4.0
Heat source per cook top	Electricity	x
	Gas	
	HS	
Energy Efficiency Index per cycle (EUEC)		101.0

**ENERGY LABEL**

**PRODUCT INFORMATION**

Complies with EU directive 2009/22/EC - Regulation No 66/2014

Brand		LGST P&G
Model		CG5005124
Type of oven	Free Standing	x
	Built-in	
	Recessed	
Heat source per cook top	Electricity	x
	Gas	
	HS	
Rated volume (l net)		60.0
Number of cook top		4.0
Energy consumption (kWh) required to heat an internal load in a cook top or an electric heated oven during a cycle in conversion mode per cycle (kWh) (kWh) (electric thermal energy) (E) (electric) (kWh) (kWh)		-
Energy consumption required to heat a standard test load in a cook top or an electric heated oven during a cycle in conversion mode per cycle (kWh) (kWh) (electric thermal energy) (E) (electric) (kWh) (kWh)		0.00
Energy consumption required to heat a standard test load in a gas-fired cook top or an electric heated oven during a cycle in conversion mode per cycle (kWh) (kWh) (gas) (gas) (thermal energy) (E) (gas) (kWh) (kWh)		
Energy consumption required to heat a standard test load in a gas-fired cook top or an electric heated oven during a cycle in conversion mode per cycle (kWh) (kWh) (gas) (gas) (thermal energy) (E) (gas) (kWh) (kWh)		
Energy Efficiency Index per cycle (EUEC)		101.0

**Information for domestic electric hobs**

Complies with EU directive 2009/22/EC - Regulation No 66/2014

Brand		LGST P&G
Model		CG5005124
Type of hob	Electric	x
	Gas	
	HS	
Number of cooking zones and area		6
Heating Technology	Radiant/Cooking Zone	
	Induction/Cooking Zone	x
	Hot Plate/Cooking Zone	
For double cooking zone or an equivalent of 4500 W total average electric heated cooking zone, rounded to nearest 15 W (l net)	Front Left Zone	20
	Front Left Zone	15
	Front Right Zone	15
	Front Right Zone	20
	Back Zone	-
	Back Zone	20
	Front Control	-
	Control Front Right	-
	Control Back Right	-
For non-double cooking zone or similar: long third width or similar surface average electric heated cooking zone or area rounded to the nearest 5 mm (l net) (l net)	Front Left Zone	-
	Front Left Zone	-
	Front Right Zone	-
	Front Right Zone	-
	Right Zone	-
	Back Zone	-
	Front Control	-
	Control Front Right	-
	Control Back Right	-
Energy consumption per cooking zone or area calculated per kg of electric cooking heating	Front Left Zone	100.00
	Front Left Zone	100.00
	Front Right Zone	100.00
	Front Right Zone	100.00
	Right Zone	-
	Back Zone	117.43
	Front Control	-
	Control Front Right	-
	Control Back Right	-
Energy consumption for the hob calculated per kg (E) (electric) (kWh) (kWh)		110.00

EU Energy Label: A 101.0 (kWh)
