PRODUCT FICHE

Brand	Beko	
Model	KA52NES	
Energy Efficiency Index per cavity		88.5
Energy efficiency class	y LLI Cavity	Δ.5
Energy consumption (kWh)-Conv	entional per curle (1)	1.53 kW
Energy consumption (kWh)-Forced air convection per cycle (1) Usable volume (litres)		- kWh
		61
Number of cavity		1.0
	Electrical	
Heat source per cavity	Gas Mix	X
	MIX	_
INST	RUCTION BOOKLET	
PRO	DUCT INFORMATION	
Comply with ELI directi	ive 2009/125/EC - Regulation No 66/2014	
Brand	Beko	
Model		
Model	KA52NES	
Type of oven	Free Standing Built-in	Х
Mass of the appliance(M) (Net We		50.8
	ergrity ng	1.0
Number of cavity	Electrical	1.0
Heat source per cavity	Gas	X
	Mix	_^
Usable volume (litres)	10000	61
cavity of an electric heated oven i cavity(kWh/cycle)(electric final en	ergy) EC electric cavity	
cavity(kWh/cycle)(electric final en Energy consumption required to helectric heated oven during a cycl	eergy) EC electric cavity	
cavity(kWh/cycle)(electric final en Energy consumption required to helectric heated oven during a cyclearity(kWh/cycle)(electric final en cavity(kWh/cycle)(electric final en Energy consumption required to heavity of an oven during a cycle in	engy) EC electric cavity east a standardised load in a cavity of an le in fan-forced mode per ergy) EC electric cavity east a standardised load in a gas-fired n conventional mode per cavity (NUCycle)	5.50 M
cavity(kWh/cycle)(electric final en Energy consumption required to helectric heated oven during a cyclearity(kWh/cycle)(electric final en cavity(kWh/cycle)(electric final en Energy consumption required to heavity of an oven during a cycle in	engy) EC electric cavity east a standardised load in a cavity of an le in fan-forced mode per ergy) EC electric cavity east a standardised load in a gas-fired n conventional mode per cavity (NUCycle)	
electric heated oven during a cycl cavity(kWh/cycle)(electric final en Energy consumption required to h cavity of an oven during a cycle in (kWh/cycle)(gas final energy) EC Energy consumption required to h	eargy EC electric cavity west a standardised load in a cavity of an ein flanforced mode per eingy EC electric cavity event a standardised load in a gas-fired convincional mode per cavity (NAICSCIe) gast cavity (gast cavity) event a standardised load in a gas-fired	
carsity(WWhicycle)(electric final en- Energy consumption required to it electric healed over during a cycl- ed consumption required to it explicitly consumption required to it cardy of an oven during a cycle in Whiteycle(e)(gas final energy) EC Energy consumption required to it cardy of an oven during a cycle in (e)(Whitcycle)(gas final energy) EC (e)(Whitcycle)(gas final energy) EC	eargy EC electric cardy seat a standardised load in a cardy of an en flashfock amobile per seat a standardised load in a cardy of an en flashfock amobile seat a standardised load in a gas-fred conventional mode per cardy (MMcycle) gas cardy (1) seat a standardised load in a gas-fred to the standardised load in a gas-fred flashfock amobile per cardy (MMcycle) gas cardy (1)	1.53 kV - MJ - kWh
cavity(WWhicycle)(electric final en Energy consumption required to helectric heated oven during a cycle electric heated oven during a cycle cavity (WWhicycle)(getter) final en cavity of an oven during a cycle in Cavity of an oven during a cycle in Exercise consumption required to heated to the cavity of an oven during a cycle in WWhicycle)(gas final energy) EC Energy Efficiency index per cavity	sergy) EC electric cavity seat a standardised load in a cavity of an exit flat of county seat a standardised load in a cavity of an exit flat occurs seat a standardised load in a gas-fired conventional mode per cavity (Mulcycle) gas cavity (1) seat a standardised load in a gas-fired flat-flored mode per cavity (Mulcycle) gas cavity (1) yet load in a standardised load in a gas-fired flat-flored mode per cavity (Mulcycle) gas cavity (1) yet load in a standardised load in a gas-fired flat-flored mode per cavity (Mulcycle) gas cavity (1)	1.53 kV - MJ
Energy consumption required to held the control of	eargy EC electric cardy west a standardised load in a cardy of an extra face of the standardised load in a cardy of an extra face of the standardised load in a gas-freed corn entorial mode per cardy (MAIcycle) gas cardy (1) east a standardised load in a gas-freed corn entorial mode per cardy (MAIcycle) gas cardy (1) east a standardised load in a gas-freed rish-forced mode per cardy (MAIcycle) gas cardy (1) ED cardy (1) ED cardy FOR of domestic gas-fired hobs	1.53 kV - MJ - kWh
Energy consumption required to held the control of	sergy) EC electric cavity seat a standardised load in a cavity of an extra a standardised load in a cavity of an extra face of the standardised load in a gas-fired core retinolal mode per cavity (MMcycle) gas cavity (1) gas cavity (1) gas cavity (1) gas cavity (1) for the standardised load in a gas-fired fast a standardised load in a gas-fired gas cavity (1) gas cavity (2) gas cavity (2) for the standardised load in a gas-fired for standardised load	1.53 kV - MJ - kWh
Energy Consumption required to held the consumption required to held the consumption required to held the consumption required to the consumpt	eargy EC electric cardy west a standardised load in a cardy of an extended in a gas-freed corner entorial mode per cardy (MAIcycle) gas cardy (1) extended in a display of a standardised load in a gas-freed corner entorial mode per cardy (MAIcycle) gas cardy (1) extended in a display of a standardised load in a gas-freed in an advantage of the cardy (MAIcycle) gas cardy (1) extended in a gas-freed in a display of the cardy (MAIcycle) gas cardy (1) extended in a gas-freed in a display of the cardy (MAIcycle) gas cardy (1) extended in a gas-freed in a display of the cardy (MAIcycle) gas cardy (1) extended in a gas-freed in a display of the cardy (MAIcycle) gas cardy (1) extended in a gas-freed in a gas	1.53 kV - MJ - kWh
Energy Consumption required to held the consumption required to held the consumption required to held the consumption required to the consumpt	sergy) EC electric cavity seat a standardised load in a cavity of an extra a standardised load in a cavity of an extra face of the standardised load in a gas-fired core retinolal mode per cavity (MMcycle) gas cavity (1) gas cavity (1) gas cavity (1) gas cavity (1) for the standardised load in a gas-fired fast a standardised load in a gas-fired gas cavity (1) gas cavity (2) gas cavity (2) for the standardised load in a gas-fired for standardised load	1.53 kV - MJ - kWh
Energy Consumption required to held the consumption required to held the consumption required to held the consumption required to the consumpt	eargy) EC electric cavity west a standardised load in a cavity of an exit fail occup for early west a standardised load in a cavity of an exit fail occup for electric cavity west a standardised load in a gas-fired core vertical mode per cavity (Mulcycle) gas cavity (1) pas cavity (1) pas cavity (1) y (EC cavity for domestic gas-fired hobs we 2009125 EC — Regulation No 662014 Belo KASZNES	1.53 kV - MJ - kWh
cavity(Whicycle)(electric final en Energy consumption required to he electric healed over during a cycli electric healed over during a cycli Energy consumption required to he cavity of an oven during a cycle in a cavity of an oven during a cycle in a cavity of an oven during a cycle in a cavity of an oven during a cycle in Cavity of an oven during a cycle in Energy Efficiency Index per cavity Informatio Comply with EU direct Braid Model	sergy) EC electric cavity seat a standardised load in a cavity of an ex flash occur mode per explored in a gas-fired conventional mode per cavity (Mulcycle) gas cavity (1) gas cavity (1) factored mode per cavity (Mulcycle) gas cavity (1) y (EE) cavity y (EE) cavity Geometric Geometric Geometric Geometric Geometric y (2) y (EE) cavity Geometric Geometric Geometric Geometric EG GEOMETRIC GEOMETRIC GEOMETRIC EG GEOMETRIC GEOMETRIC EG GEOMETRIC GEOMETRIC EG G	1.53 kV - MJ - kWh
cavity(WWhicycle)(electric final en Energy consumption required to helder in the lead of	eargy EC electric cardy east a standardised load in a cardy of an extended in a cardy of an extended in a cardy of an extended in a cardy of an east a standardised load in a gas-freed corn enforced mode per cardy (MAIcycle) gas cardy (1) east a standardised load in a gas-freed corn enforced mode per cardy (MAIcycle) gas cardy (1) east a standardised load in a gas-freed in fan-forced mode per cardy (MAIcycle) gas cardy (1) for of domestic gas-fired hobs to 2009/125/EC — Regulation to 66/0214 Electrical KAS2NES Electrical	1.53 kV - MJ - kWH 88.5
cavity(WWh/cycle)(electric final en Energy consumption required to helectric heater over during a cycle Energy consumption required to helectric heater over during a cycle Energy consumption required to heavyly EC Energy consumption required to heavyly EC Energy consumption required to the cavity of an over during a cycle in (WWh/cycle)(gas final energy) EC Energy Efficiency index per cavity Informatio Comply with EU direct Brend Brend Model Type of hob Namber of gas burners	sergy) EC electric cavity west a standardised load in a cavity of an exit fail of code mode per every) EC effect cavity west a standardised load in a gas-fired conventional mode per cavity (Mircycle) gas cavity (1) fail fail of cavity (1) fail fail fail of cavity (1) gas cavity (1) y EEI cavity y y EEI cavity for dromastic gas-fired hobs the 2009/125/EC - Regulation file 66/2014 Beto Electrical Beto Electrical Beto Electrical Beto Electrical Mix	1.53 kW - MJ - kWh 88.5
Energy consumption required to helectic final em Energy consumption required to helectic heater deven during a cycle Finergy consumption required to he Energy of an oven during a cycle re Energy of an oven during a cycle re Energy Efficiency index per cardy Comply with EU direct Brand Model Type of hob Blumber of gas humers Energy efficiency per gas humers Energy of the EU direct Energy efficiency per gas humers	sergy) EC electric cavity seat a standardised load in a cavity of an es in fair-fock and sept est a standardised load in a cavity of an est fair-fock and sept est a standardised load in a gas-fred conventional mode per cavity (MA/cycle) gas cavity (1) est a standardised load in a gas-fred at a standardised load in a gas-fred gas cavity (10) est a standardised load in a gas-fred gas cavity (10) est a standardised load in a gas-fred gas cavity (10) est a standardised load in best fred at a standardised load in a gas-fred gas cavity (10) est a standardised load in a gas-fred gas cavi	1.53 kV - MJ - kWh 88.5
carehy(White/cycle)(electric final en Energy consumption required to helectric healest oven during a cycle Energy consumption required to helectric healest oven Energy consumption required to heavy for an oven during a cycle in Carehy of an oven during a cycle in Comply of an oven during a cycle in Comply of an oven during a cycle in Energy consumption required to he Comply of an oven during a cycle in Informatio Comply with EU direct Brand Model Type of hob Number of gas burners Energy efficiency per gas burners	vergy) EC electric cardy vergy) EC electric cardy verg a standardised load in a cardy of an sel fine for execute mode per verg and the form of the form of the form of the form verg and the form of the form of the form of the form verg and the form of the form of the form of the form verg and the form of the form of the form of the form verg and the form of the form of the form of the form verg 2009/125 EC — Regulation In 6 6/2014 Electrical Sas MASSIVES Electrical Electrical Front Left Zene Rest Left Zene Rest form of the f	1.53 kW - MJ - kWh 88.5
cardy(MWhcycle)(electric final en Energy consumption required to helectric histolic diversity of the electric histolic diversity of the electric histolic energy (MWhcycle) (electric histolic histolic cardy of an oven during a cycle if a Whrey consumption required to heavy) EC Energy consumption required to heavy) EC (WWhcycle)(gas final energy) EC (WWhcycle)(gas final energy) EC Energy (Efficiency) index per cavity information and experience of the energy) EC Energy (Efficiency) index per cavity	sergy) EC electric cavity seat a standardised load in a cavity of an es in fair-fock and sept est a standardised load in a cavity of an est fair-fock and sept est a standardised load in a gas-fred conventional mode per cavity (MA/cycle) gas cavity (1) est a standardised load in a gas-fred at a standardised load in a gas-fred gas cavity (10) est a standardised load in a gas-fred gas cavity (10) est a standardised load in a gas-fred gas cavity (10) est a standardised load in best fred at a standardised load in a gas-fred gas cavity (10) est a standardised load in a gas-fred gas cavi	1.53 kW - MJ - kWh 88.5
carehy(White/cycle)(electric final en Energy consumption required to helectric healest oven during a cycle Energy consumption required to helectric healest oven Energy consumption required to heavy for an oven during a cycle in Carehy of an oven during a cycle in Comply of an oven during a cycle in Comply of an oven during a cycle in Energy consumption required to he Comply of an oven during a cycle in Informatio Comply with EU direct Brand Model Type of hob Number of gas burners Energy efficiency per gas burners	vergy) EC electric cardy vergy) EC electric cardy verg a standardised load in a cardy of an sel fine for execute mode per verg and the form of the form of the form of the form verg and the form of the form of the form of the form verg and the form of the form of the form of the form verg and the form of the form of the form of the form verg and the form of the form of the form of the form verg 2009/125 EC — Regulation In 6 6/2014 Electrical Sas MASSIVES Electrical Electrical Front Left Zene Rest Left Zene Rest form of the f	- kWh 88.5
