	PRODUCT FICHE	
53	tive EU2010/30/EU-No65/2014 of ovens	
Brand	Beko	
Model	KTG611W	717
Energy Efficiency Index per cavit Energy efficiency class	y EEI cavity	71.7 A+
Energy efficiency class Energy consumption (kWh)-Conventional per cycle (1)		1.33 kW
Energy consumption (kWh)-Force	ed air convection per cycle (1)	- kWh
Usable volume (litres)		72
Number of cavity		2.0
	Electrical	
Heat source per cavity	Gas Mix	х
INST	TRUCTION BOOKLET	
PRO	DUCT INFORMATION	
	ive 2009/125/EC - Regulation No 66/2014	
Brand	Beko	
Model	KTG611W	
Type of oven	Free Standing	Х
CONTRACTOR OF THE PROPERTY OF	Built-in	
Mass of the appliance(M) (Net Wo	eight) kg	53.3
Number of cavity		2.0
Heat source per cavity	Electrical Gas	×
Heat source per cavity	Mix	^
Usable volume (litres)	Inny	72
electric heated oven during a cycl	nergy) EC electric cavity  neat a standardised load in a cavity of an le in fan-forced mode per	
electric heated oven during a cycl cavity(kWh/cycle)(electric final er	neat a standardised load in a cavity of an le in fan-forced mode per nergy) EC electric cavity	
electric heated oven during a cycl cavity(kWh/cycle)(electric final er Energy consumption required to h	neat a standardised load in a cavity of an ite in fain-forced mode per energy) EC electric cavity wheat a standardised load in a gas-fired in conventional mode per cavity (MMcycle)	4.80 MJ
electric heated oven during a cycl cavity(kWh/cycle)(electric final er Energy consumption required to cavity of an oven during a cycle in (kWh/cycle)(gas final energy) EC	wast a standardised load in a cavity of an le in fae-forced mode per sergy) EC electric cavity weat a standardised load in a gas-fired in conventional mode per cavity (MUIcycle) gas cavity (1)	4.80 MJ
electric heated oven during a cycl cavity(kWh/cycle)(electric final er Energy consumption required to heavity of an oven during a cycle is (kWh/cycle)(gas final energy) EC Energy consumption required to heavity of the consumption required to heavity and the consumption required to heav	wat a standardised toad in a cavity of an telegry EC electric cavity wat a standardised toad in a gas-fired conventional mode per cavity (Micycle) gas cavity (1) wat a standardised toad in a gas-fired cavity (1) may be standardised toad in a gas-fired to a standardised toad in a gas-fired to a fired cavity (Micycle) and standardised toad in a gas-fired to a fired cavity (Micycle)	
electric heated oven during a cycl- cav hy/kWh/cycle) electric final er Energy consumption required to Energy consumption required to k (kWh/cycle)(gas final energy) EC Energy consumption required to I cavity of an oven during a cycle is (kWh/cycle)(gas final energy) EC	well a standardised load in a cavity of an in in fair-forced mode per vergy) EC electric cavity heat a standardised load in a gas-fired come without mode per cavity (MUcycle) garc cavity (1) what a standardised load in a gas-fired fair-forced mode per cavity (MUcycle) gas cavity (1)	1.33 kW - MJ - kWh
electric heated oven during a cycl cavity/kWh/cycle)/electric final er Energy consumption required to It cavity of an oven during a cycle is (kWh/cycle)(gas final energy) EC Energy consumption required to It cavity of an oven during a cycle is (kWh/cycle)(gas final energy) EC Energy Efficiency Index per cavity	wad a standardised load in a cavity of an le in fan forced mode per energy) EC electric cavity wat a standardised load in a gas-fired conventional mode per cavity (MAIcycle) gas cavity (1) and a standardised load in a gas-fired fan fan far forced mode per cavity (MAIcycle) gas cavity (1) yet cavity (MAIcycle) gas cavity (1) yet cavity (1) yet cavity (1)	1.33 kW - MJ
eledric hasted oven during a cycle are nythinkhoycle) electric final er are nythinkhoycle) electric final er Energy consumption required to heavy of an oven during a cycle at (White) cycle) (gas final energy). EC Energy consumption required for high groom well or expand to the standard of the cycle) of the cycle of	well a standardised load in a cavity of an in in fan-forced mode per length EC electric cavity wast a standardised bad in a gas-fined room entional mode per cavity (Malcycle) gas cavity (1) wast a standardised load in a gas-fined fan-forced mode per cavity (Malcycle) gas cavity (1) yell cavity (I) CI cavity (II) yell cavity for domestic gas-fired hobs	1.33 kW - MJ - kWh
eledric hasted oven during a cycle are nythinkhoycle) electric final er are nythinkhoycle) electric final er Energy consumption required to heavy of an oven during a cycle at (White) cycle) (gas final energy). EC Energy consumption required for high groom well or expand to the standard of the cycle) of the cycle of	wad a standardised load in a cavity of an le in fan forced mode per energy) EC electric cavity wat a standardised load in a gas-fired conventional mode per cavity (MAIcycle) gas cavity (1) and a standardised load in a gas-fired fan fan far forced mode per cavity (MAIcycle) gas cavity (1) yet cavity (MAIcycle) gas cavity (1) yet cavity (1) yet cavity (1)	1.33 kW - MJ - kWh
electric hasted over during a cycle cut nytoWhitocycle)electric final er Energy consumption required to carries of an even during a cycle (ofthiscocklypas final energy) EC Energy consumption required to carries of an even during a cycle carry of an even during a cycle (ofthiscocklypas final energy) EC Energy Efficiancy Index per care? Information Comply with EU direct Brand	well a standardised load in a cavity of an in in fas-forced mode per engig) EC electric cavity was a standardised bad in a gas-fixed conventional mode per cavity (MAIrcycle) gas cavity (1) well a standardised load in a gas-fixed fas-fixed mode per cavity (MAIrcycle) gas cavity (1) y EEI cavity y VEI cavity we 2009/125EC — Registation No 66/2014	1.33 kW - MJ - kWh
eledific basted over during a gold early filter of any flowing the control of the careful of the careful of an over during a cycle and overly of an overduring a cycle and overduring a cycl	west a standardised load in a cavity of an in in fair-forced mode per sergity EC electric cavity west a standardised load in a gas-fired conventional mode per cavity (MAIcycle) gas cavity (1) west a standardised load in a gas-fired to fairced mode per cavity (MAIcycle) gas cavity (1) y (EEI cavity ) are of women size gas-fired hobs we 2009/125-EC - Regulation No 602014 Belo	1.33 kW - MJ - kWh
eledific heated over during a cycle certification of any hybridy-cycle section fine of early consumption required to learly of an over during a cycle in cardy of an over during a cycle in cardy of an over during a cycle in cycle (hybridycycle)(gas final energy) EC Energy consumption required to hybridycycle)(gas final energy) EC (hybridycycle)(gas final energy) EC Compty Efficiency Index per cardy Energy Energy Efficiency Index per cardy Energy E	well a standardiosed load in a cavity of an in in fan-forced mode per vergy) EC electric cavity well as standardiosed load in a gas-fixed well as standardiosed load in a gas-fixed well as standardiosed load in a gas-fixed gas cavity (1) well a standardiosed load in a gas-fixed in fan-forced mode per cavity (MJCycle) gas cavity (1) yell cavity (1) yell cavity (1) yell cavity (1) Electrical KTG611W Electrical	1.33 kW - MJ - kWh
electric hasted over during a cycle cut nytoWhitocycle)electric final er Energy consumption required to carries of an even during a cycle (ofthiscocklypas final energy) EC Energy consumption required to carries of an even during a cycle carry of an even during a cycle (ofthiscocklypas final energy) EC Energy Efficiancy Index per care? Information Comply with EU direct Brand	well a standardised load in a cavity of an le in fas-forced mode per engig EC decision cavity was a standardised load in a gas-fored mode per cavity (MAIcycle) gas cavity (1) conventional mode per cavity (MAIcycle) gas cavity (1) c	1.33 kW - MJ - kWh
eledific heated overed unique, and on any Nothinopole control from en any Nothinopole control from en any Nothinopole control from ending a cycle and even during a cycle energy! EC (Whiteche) (gas final energy) EC (Energy Efficiency Index per canol Comply with EU direct Daniel Comply with EU d	well a standardiosed load in a cavity of an in in fan-forced mode per vergy) EC electric cavity well as standardiosed load in a gas-fixed well as standardiosed load in a gas-fixed well as standardiosed load in a gas-fixed gas cavity (1) well a standardiosed load in a gas-fixed in fan-forced mode per cavity (MJCycle) gas cavity (1) yell cavity (1) yell cavity (1) yell cavity (1) Electrical KTG611W Electrical	1.33 kW - MJ - kWh
electric basted over during a cycle can hybithylocyteleyelectric final er can hybithylocyteleyelectric final er can hybithylocyteleyelectric final er can hybithylocyteleyelectric final er can hybithylocyteleyeleyelectric final hybithylocyteleyelectric final hybithylocyteleyelectric final energy) EC careful of an oven during a cycle a cycle informatio Comply with EU direct Brand Models  Type of hob  Number of gas burners	well a standardised load in a cavity of an ein frandorced mode per engry EC dector. cavity well a standardised load in a gas fixed conventional mode per cavity (MAIcycle) gas cavity (1) well a standardised load in a gas-fixed frand-fracted mode per cavity (MAIcycle) gas cavity (1) y EEI cavity y EEI cavity y EEI cavity y EEI cavity x EEI	1.33 kW - MJ - kWh 71.7
electic basted over during a cycle con sylvibrio-(special final er carly consumption required to facility of an over during a cycle in carly of an over during a cycle in control of an over during a cycle in (Whito-coa)(gas final energy) EC Comply with EU direct Brand Model  Type of hob  Number of gas burners  Energy efficiency as Burners  Energy efficiency as Burners	weal a standardiosol load or a cavity of an in fas-forced mode per sergity. Et declaric cavity with a fas-forced mode per sergity. Et declaric cavity with a standardiosol load or a gas-fired mode per cavity (MU-cycle) gas cavity (1) and a standardiosol load or a gas-fired nan-forced mode per cavity (MU-cycle) gas cavity (1) gas cavity (1) gas cavity (1) get cavity	1.33 kW - MJ - kWh 71.7
electric basted over during a cycle can hybithylocyteleyelectric final er can hybithylocyteleyelectric final er can hybithylocyteleyelectric final er can hybithylocyteleyelectric final er can hybithylocyteleyeleyelectric final hybithylocyteleyelectric final hybithylocyteleyelectric final energy) EC careful of an oven during a cycle a cycle informatio Comply with EU direct Brand Models  Type of hob  Number of gas burners	well a standardised load in a casely of an in Infa-forced mode per engig) EC electric carely was a standardised bad in a gas-fixed conventional mode per cavely (MAIcycle) gas cavely (1) conventional mode per cavely (MAIcycle) gas cavely (1) and a standardised load in a gas-fixed in 1se-forced mode per cavely (MAIcycle) gas cavely (1) and the standardised load in a gas-fixed para cavely (1) and the standardised load in	1.33 kW - MJ - kWh 71.7
electic basted over during a cycle con sylvibrio-(special final er carly consumption required to facility of an over during a cycle in carly of an over during a cycle in control of an over during a cycle in (Whito-coa)(gas final energy) EC Comply with EU direct Brand Model  Type of hob  Number of gas burners  Energy efficiency as Burners  Energy efficiency as Burners	weal a standardised load in a cavity of an in fas-forced mode per sergity. EC electric cavity in fas-forced mode per sergity. EC electric cavity inset a standardised load in a gas-fired conventional mode per cavity (Mulcycle) gas cavity (1) gas c	1.33 kW - MJ - kWh 71.7
electic basted over during a cycle con sylvibrio-(special final er carly consumption required to facility of an over during a cycle in carly of an over during a cycle in control of an over during a cycle in (Whito-coa)(gas final energy) EC Comply with EU direct Brand Model  Type of hob  Number of gas burners  Energy efficiency as Burners  Energy efficiency as Burners	well a standardised load in a casely of an in fas-forced mode per engig) EC decision carely was a standardised bad in a gas-fored conventional mode per cavely (MAIcycle) gas cavely (1) conventional mode per cavely (MAIcycle) gas cavely (1) cavely cavely cavely cavely cavely (1) cavely cave	1.33 kW - MJ - kWh 71.7
