

Product fiche concerning the COMMISSION DELEGATED REGULATION (EU) No 1061/2010 of 28 September 2010

| Product code WMFABRO1 Rated capacity in kg of cotton for the standard 60 °C cotton programme at full load or the 40 °C cotton programme at full load, whichever is the lower Energy efficiency class Energy consumption "X" kWh per year, based on 220 standard washing cycles for cotton programmes at 60 °C and 40 °C at full and partial load, and the consumption of the low-power modes. Actual energy consumption will depend on how the appliance is used Energy consumption - 60 °C cotton programme at full load 1.08 kWh Energy consumption - 60 °C cotton programme at partial load 0.98 kWh Energy consumption - 40 °C cotton programme at partial load 0.80 kWh Weighted power consumption of the left-on mode 0.2 W Weighted power consumption of the left-on mode 0.8 W Water consumption "X" litres per year, based on 220 standard washing cycles for cotton programmes at 60 °C and 40 °C at full and partial load. Actual water consumption will depend on how the appliance is used Spin-drying efficiency class "X" on a scale from G (least efficient) to A (most efficient) Maximum spin speed attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load o Standard washing programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load 150 min Programme time of the 'standard 60 °C cotton programme' at partial load 150 min Programme time of the 'standard 40 °C cotton programme' at partial load 150 min Programme time of the 'standard 40 °C cotton programme' at partial load 150 min Programme time of the 'standard 40 °C cotton programme' at partial load 150 min Programme time of the 'standard 40 °C cotton programme' at partial load 150 min Programme time of the 'standard 40 °C cotton programme' at put during the washing phase for the standard 60 °C cotton programme at full load 150 min 150 min | Supplier name or brand | SMEG |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------|---------------------------|
| Energy efficiency class Energy consumption "X" kWh per year, based on 220 standard washing cycles for cotton programmes at 60 °C and 40 °C at full and partial load, and the consumption of the low-power modes. Actual energy consumption will depend on how the appliance is used Energy consumption - 60 °C cotton programme at full load Energy consumption - 60 °C cotton programme at partial load Energy consumption - 60 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load Energy consumption of the left-on mode Weighted power consumption of the left-on mode Weighted power consumption of the left-on mode Water consumption "X" litres per year, based on 220 standard washing cycles for cotton programmes at 60 °C and 40 °C at full and partial load. Actual water consumption will depend on how the appliance is used Spin-drying efficiency class "X" on a scale from G (least efficient) to A (most efficient) B Maximum spin speed attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programmes to which the information in the label and the fiche relates. These programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load Frogramme time of the 'standard 60 °C cotton programme' at full load Frogramme time of the 'standard 60 °C cotton programme' at partial load Frogramme time of the 'standard 60 °C cotton programme' at partial load Frogramme time of the 'standard 60 °C cotton programme' at partial load Frogramme time of the 'standard 60 °C cotton programme' at partial load Frogramme time of the 'standard 60 °C cotton programme at full load Frogramme time of the 'standard 60 °C cot | Product code | WMFABRO1 |
| Energy consumption "X" kWh per year, based on 220 standard washing cycles for cotton programmes at 60 °C and 40 °C at full and partial load, and the consumption of the low-power modes. Actual energy consumption will depend on how the appliance is used Energy consumption - 60 °C cotton programme at full load Energy consumption - 60 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load Energy consumption of the off-mode Energy consumption of the one Energy energy based on 22 W Energy consumption of the one Energy energy and washing cycles for cotton programme at 60 °C and 40 °C at full and partial load on 20 °C energy | | 7 Kg |
| programmes at 60 °C and 40 °C at full and partial load, and the consumption of the low-power modes. Actual energy consumption will depend on how the appliance is used Energy consumption - 60 °C cotton programme at full load Energy consumption - 60 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at 60 °C cotton programme at full load or the standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load or the standard washing programmes to which the information in the label and the fiche relates. These programmes are suitable to clean normally soiled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load 150 min Programme time of the 'standard 40 °C cotton programme' at partial load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load | Energy efficiency class | A+ |
| Energy consumption - 60 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load Weighted power consumption of the off-mode Weighted power consumption of the left-on mode Weighted power consumption "X" litres per year, based on 220 standard washing cycles for cotton programmes at 60 °C and 40 °C at full and partial load. Actual water consumption will depend on how the appliance is used Spin-drying efficiency class "X" on a scale from G (least efficient) to A (most efficient) Maximum spin speed attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load o Standard washing programmes to which the information in the label and the fiche relates. These programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load 150 min Programme time of the 'standard 40 °C cotton programme' at partial load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load | programmes at 60 °C and 40 °C at full and partial load, and the consumption of the | 218 KWh |
| Energy consumption - 40 °C cotton programme at partial load 0.80 KWh Weighted power consumption of the off-mode 0.2 W Weighted power consumption of the left-on mode 0.8 W Water consumption "X" litres per year, based on 220 standard washing cycles for cotton programmes at 60 °C and 40 °C at full and partial load. Actual water consumption will depend on how the appliance is used Spin-drying efficiency class "X" on a scale from G (least efficient) to A (most efficient) Maximum spin speed attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load o Standard washing programmes to which the information in the label and the fiche relates. These programmes are suitable to clean normally soiled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load 150 min Programme time of the 'standard 40 °C cotton programme' at partial load 150 min Programme time of the 'standard 40 °C cotton programme' Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load 78 dB(A) re 1pW 78 dB(A) re 1pW | Energy consumption - 60 °C cotton programme at full load | 1.08 KWh |
| Weighted power consumption of the off-mode Weighted power consumption of the left-on mode Water consumption "X" litres per year, based on 220 standard washing cycles for cotton programmes at 60 °C and 40 °C at full and partial load. Actual water consumption will depend on how the appliance is used Spin-drying efficiency class "X" on a scale from G (least efficient) to A (most efficient) Maximum spin speed attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load o Standard washing programmes to which the information in the label and the fiche relates. These programmes are suitable to clean normally soiled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load Programme time of the 'standard 60 °C cotton programme' at partial load Programme time of the 'standard 40 °C cotton programme' Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load | Energy consumption - 60 °C cotton programme at partial load | 0.98 KWh |
| Weighted power consumption of the left-on mode Water consumption "X" litres per year, based on 220 standard washing cycles for cotton programmes at 60 °C and 40 °C at full and partial load. Actual water consumption will depend on how the appliance is used Spin-drying efficiency class "X" on a scale from G (least efficient) to A (most efficient) Maximum spin speed attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load o Standard washing programmes to which the information in the label and the fiche relates. These programmes are suitable to clean normally soiled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load 150 min Programme time of the 'standard 40 °C cotton programme' at partial load 150 min Programme time of the 'standard 40 °C cotton programme' Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load | Energy consumption - 40 °C cotton programme at partial load | 0.80 KWh |
| Water consumption "X" litres per year, based on 220 standard washing cycles for cotton programmes at 60 °C and 40 °C at full and partial load. Actual water consumption will depend on how the appliance is used Spin-drying efficiency class "X" on a scale from G (least efficient) to A (most efficient) Maximum spin speed attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load o Standard washing programmes to which the information in the label and the fiche relates. These programmes are suitable to clean normally soiled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load 150 min Programme time of the 'standard 40 °C cotton programme' at partial load 150 min Programme time of the 'standard 40 °C cotton programme' 150 min Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load 78 dB(A) re 1pW | Weighted power consumption of the off-mode | 0.2 W |
| programmes at 60 °C and 40 °C at full and partial load. Actual water consumption will depend on how the appliance is used Spin-drying efficiency class "X" on a scale from G (least efficient) to A (most efficient) Maximum spin speed attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load o Standard washing programmes to which the information in the label and the fiche relates. These programmes are suitable to clean normally soiled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load 150 min Programme time of the 'standard 40 °C cotton programme' Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load 78 dB(A) re 1pW 78 dB(A) re 1pW | Weighted power consumption of the left-on mode | 0.8 W |
| Maximum spin speed attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load o Standard washing programmes to which the information in the label and the fiche relates. These programmes are suitable to clean normally soiled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load Programme time of the 'standard 60 °C cotton programme' at partial load 150 min Programme time of the 'standard 40 °C cotton programme' Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load 78 dB(A) re 1pW | programmes at 60 °C and 40 °C at full and partial load. Actual water consumption will | 10340 litres |
| standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load o Standard washing programmes to which the information in the label and the fiche relates. These programmes are suitable to clean normally soiled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load Programme time of the 'standard 60 °C cotton programme' at partial load 150 min Programme time of the 'standard 40 °C cotton programme' Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load 78 dB(A) re 1pW | Spin-drying efficiency class "X" on a scale from G (least efficient) to A (most efficient) | В |
| These programmes are suitable to clean normally soiled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load Programme time of the 'standard 60 °C cotton programme' at partial load Programme time of the 'standard 40 °C cotton programme' Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase 78 dB(A) re 1pW for the standard 60 °C cotton programme at full load | standard 40 °C cotton programme at partial load, whichever is the lower, and remaining | 1400 rpm |
| Programme time of the 'standard 60 °C cotton programme' at partial load 150 min Programme time of the 'standard 40 °C cotton programme' Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load 78 dB(A) re 1pW for the standard 60 °C cotton programme at full load | These programmes are suitable to clean normally soiled cotton laundry and they are the | Cotton 60° and Cotton 40° |
| Programme time of the 'standard 40 °C cotton programme' Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase 78 dB(A) re 1pW for the standard 60 °C cotton programme at full load | Programme time of the 'standard 60 °C cotton programme' at full load | 150 min |
| Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase 78 dB(A) re 1pW for the standard 60 °C cotton programme at full load | Programme time of the 'standard 60 °C cotton programme' at partial load | 150 min |
| for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load 78 dB(A) re 1pW | Programme time of the 'standard 40 °C cotton programme' | 150 min |
| for the standard 60 °C cotton programme at full load | | 59 dB(A) re 1pW |
| Installation Free-standing | | 78 dB(A) re 1pW |
| | Installation | Free-standing |
